

# CLIMATE 2020

**A RESILIENT & SUSTAINABLE AUSTRALIA**

**9–12 NOVEMBER**  
**MELBOURNE**  
**CONVENTION AND**  
**EXHIBITION CENTRE**

**CLIMATE 2020 will focus on the role of climate change science in identifying and managing Australia's climate challenges.**

This event will be an excellent opportunity to hear about the latest Australian climate change science and how it is being used to build a resilient and sustainable Australia.

Join researchers, policymakers, industry and community representatives, traditional owners, students and those involved in the development, exchange and application of climate change information the opportunity to discuss and explore the latest work in:

- climate model development
- coastal climate
- climate variability and change
- Australia's water and carbon
- projections of climate changes and extremes
- provision, communication and application of climate change information.
